Education

Savitribal Phule Pune University, Master of Computer Science

Sept 2024 – May 2026

- CGPA: 6.8/10

Technologies

Languages: C, Java, SQL, JavaScript, HTML, CSS, Three.js, Node.js, Express.js

Databases: Postgresql, MongoDB

Tools & Platforms: Git, Linux, VS Code

Projects

3D Hostel Visualization Module

Ongoing

- **Description:** An interactive 3D visualization module designed to enhance the existing Hostel Management System by allowing users to explore and view the hostel layout, rooms, and structure in a virtual 3D environment.
- **Tools Used:** Three.js, JavaScript, HTML, CSS.
- **Roles and Responsibilities:**
 - Designed a 3D model of the hostel building with room-level detailing.
 - Implemented user-friendly navigation and camera controls for exploring the model.
 - Integrated the 3D module with the main Hostel Management System.
 - Optimized rendering performance and ensured smooth interaction on web browsers.

Movie Database Management System (IMDB Sample App)

Aug 2025 - Nov 2025

- **Description:** A full-stack RESTful API application for managing movies with IMDB ID integration, featuring CRUD operations, search, and filtering.
- **Tools Used:** Node.js, Express.js, MongoDB, Mongoose, Webpack, Babel.
- **Roles and Responsibilities:**
 - Developed RESTful API with modular MVC architecture and service-layer separation.
 - Designed MongoDB schema with indexing and text search for efficient queries.
 - Implemented CRUD features, search endpoints, and IMDB-based movie identification.
 - Integrated security middleware, structured logging, and robust error handling.
 - Configured build automation using Webpack and environment-specific setups.

ONLINE HOSTEL MANAGEMENT SYSTEM

Feb 2022 - May 2022

- **Description:** The online hostel management system provides a centralized platform for managing various aspects of hostel administration, including room allocation, reservations, billing, maintenance, and communication.
- **Tools Used:** HTML, CSS, JavaScript for front-end development, Java for back-end logic, PostgreSQL for database management.
- **Roles and Responsibilities:**
 - Connected web pages with each other and integrated database functionality.
 - Performed database operations for data management and retrieval.
